ABOUT VOKKERO®

VOKKERO® is a brand offering complete communication systems, consisting of a set of portable radio terminals and a wide selection of headsets and accessories.

Its systems enable multiple users to create an instant, continuous and secure audio conference. The terminals are hands-free and therefore do not require a fixed relay. Simple, intuitive and economical (free frequencies) to use, VOKKERO® systems meet the specificities and requirements of all our clients thanks to the numerous readily accessible functions.

Equipped with a patented noise filter, VOKKERO® solves all communication problems in noisy environments. Recognised all over the world by referees of team sports, VOKKERO® products are also perfectly suited to the construction, industry, maritime, security, broadcasting and catering sectors.

VOKKERO® systems have helped improve decision-making in the field and have played a vital role in facilitating communication, including preventive, within the refereeing team. Acclaimed by our referees, notably for their enhanced communication capability.

With its open microphone system, referees can be in constant communication in an efficient and effective manner.
